

File Audit — R3 (authoritative-file register)

Purpose	Authoritative file	Status
Customer app	deploy/app.html	Server-auth gate; pilot-only; NOT production-ready
Operations Console	deploy/admin.html	Supabase session + AAL2 + internal role
Auth pages	deploy/auth/*.html	invite, callback, setup-mfa, challenge-mfa, reset-password
Public site	deploy/index.html, demo.html, video.html, terms.html, privacy.html	Public; synthetic Demo Mode
Redirect stub	deploy/checkout.html	Stripe-free redirect
Headers	deploy/_headers	CSP allows only staging Supabase origin; no Stripe; payment=()
DB schema	supabase/migrations/*.sql (12)	Apply cleanly to real Postgres 16
RLS + tests	supabase/migrations/..._rls_policies.sql, supabase/tests/	26/26 local
Edge Functions	supabase/functions/* (20)	deno check 20/20
Product truth / claims / limitations / matrix	docs/release/*.pdf	R3
Architecture	docs/release/ARMP_ARCHITECTURE.pdf	Planes, AAL, roles
Import template	templates/ARMP_Invoice_Import_Template.xlsx	7 required + 4 recommended

Deliberately excluded

R2 format-only pilot code and its UI; Google-domain console gate; any pre-R2 credentialed baseline; Stripe artifacts. Superseded R2 docs are not carried as active deliverables.
